

Turn-Signal Switch Wiring

Match the MASTERCELL input wires to this diagram by the function not the wire color. Different Infinitybox configurations may have different wire colors for the turn signal, horn and 4-way inputs.

*NOTE: Infinitybox wire Colors & Connector Positions will vary for different kits. See the Configuration Sheet that came with your kit for exact wire colors and locations.

**NOTE: MASTERCELL inputs must be ground switched. Applying 12-volts directly to an input will damage the MASTERCELL and void the warranty.
